WORK EXPERIENCE

Java Developer in Test
EPAM Training Center

10/2021 - 05/2022   *Remote*

Achievements/Tasks

- Learn CS Basics, Software Development Methodologies, Version Control with Git and Automation tools.
- Solve tasks on CI with Jenkins, Java Basics.

Engineer / Test technician
The State Space Corporation "Roscosmos"

05/2013 - Present   *Baikonur Cosmodrome*

Achievements/Tasks

- Development, testing of software and ground control system computers, as well as testing programs in the languages Dragon-JAVA and Python.
- Conducting software testing of on-board computers and ground complexes according to the approved project testing plans.
- Manage activities undertaken by subordinates.
- *Key achievements:*
- Developed a warehouse accounting automation system (as a result, the time spent on entering information decreased from 1 hour to 5 minutes from each document).
- Increased the efficiency of the temperature control system (as a result of improvements, the amount of electricity costs decreased by 14-19%).
- Reduced the probability of error due to the human factor (made changes to a number of test instructions, eliminated errors/inaccuracies).

HIGHER EDUCATION

Development Engineering in Test
Moscow Aviation Institute (National Research University)

Software Engineering
Tomsk State University of Control Systems and Radioelectronics

2022 - Present

SKILLS (BASIC LEVEL)

`Python` `Java` `Javascript` `HTML` `CSS`

`Selenium IDE` `Android` `iOS` `SQL` `Git`

`Jenkins`

PERSONAL PROJECTS

Automated UI tests with Python using Selenium.

Program, that use current stock data from Yahoo!finance.

The Louvre Museum website
